

# Cyren Web Security

Enterprise Security SaaS

## Your Secure Web Gateway in the cloud for any user, anywhere, on any device

Cyren Web Security provides enforcement of Web policy and state-of-the-art threat protection for your business users with intrinsic SaaS simplicity: quick to deploy, easy to manage, comprehensive in coverage, and requiring just a subscription to start. Service options range from easy-to-deploy DNS filtering to multilayered defense-in-depth, protecting you from a broad range of threats including malicious URL requests, phishing attacks, viruses, zero-day malware, botnets, and much more. Benefits include:

**Internet Security at Cloud Speed**—The IT landscape has changed dramatically, with data and applications moving to the cloud and employees who are mobile and connected everywhere—essentially, the corporate perimeter is disappearing, and traditional security appliances are increasingly outgunned. Only security operating 100% from a global, elastic, multi-tenant cloud can deliver the instantaneous intelligence and processing power adequate to today's threat landscape—including inspection of SSL traffic. Cyren operates the industry's largest global security cloud—we process over 17 billion transactions a day from over 1 billion users in over 180 countries.

**Zero-Day Malware Protection**—Cyren Web Security's Advanced Threat Protection module applies cloud-scale advanced malware analysis, including industry-first Cloud Sandbox Array technology, to analyze and block the latest generation of highly evasive cyber threats.

**Always Up to Date, Everywhere**—With Cyren's security cloud protecting your traffic, your web security is always the latest and best, for all your users and at all your business locations—or wherever your users happen to be. When our global intelligence network detects a threat, that defense is incorporated in real time into our security cloud and immediately protects all users—there are no time-consuming updates to “roll out”.

**Least Headache, Lowest TCO**—Cyren Web Security does not require any investment in hardware or software—just route your traffic to our security cloud. The ease of deployment and management, along with better protection, frees IT to focus resources on value-adding projects. As a SaaS service, it's easy to turn on Cyren protection for your immediate security gaps, and then transition to comprehensive cloud security.

### Why move your web security to the cloud?

- Adopt a pay-as-you-go subscription model
- Minimize your TCO—eliminate the need for hardware and software upgrades and save staff time spent managing appliances
- Reduce time spent remediating infected computers
- Monitor and manage web usage with easy-to-use URL filtering; gain detailed insight across all your users, locations, and devices
- Easily manage multiple sites—our cloud platform makes it easy to consistently apply policy
- Go direct to the Internet securely, reducing latency for all users and minimizing backhauling costs
- Protect users from new threats with real-time cyber intelligence which updates automatically
- Protect your remote and roaming workers, no matter the device
- Deploy easily and quickly

**Comprehensive Visibility and Reporting**—Cyren Web Security provides comprehensive and customizable reports on your users’ Web activity—across all their business devices. All Web access is captured and logged, giving you a detailed picture of exactly how the Web is used in your organization. Cyren Web Security gives you an easy-to-use and custom-izable dashboard that enables you to control the types and size of files that can be downloaded and Web sites that can be visited. Our advanced dashboard gives you instant insight into current threats and Web traffic.

“ Cyren technology is among the most powerful and responsive we’ve seen. The ability to automatically analyze billions of Internet transactions in real time and identify new threats as they emerge means we are always one step ahead of new threats.”

– ANDREW MILLINGTON, CEO, EXCLAIMER LTD.
